

SOUL 2.0

Software for University Libraries

INFLIBNET Centre
(An IUC of UGC)

Overview

Software for University Libraries (SOUL2.0) is designed and developed by the INFLIBNET Centre based on requirements of college and university libraries.

- **state-of-the-art integrated library management software**
- **user-friendly software developed to work under client-server environment.**
- **compliant to international standards for bibliographic formats, networking and circulation protocols.**
- **designed for latest versions of MS-SQL and MySQL (or any other popular RDBMS).**
- **compliant to international standards such as MARC 21 bibliographic format,**
- **Unicode based Universal Character Sets for multilingual bibliographic records and**
- **NCIP 2.0 based protocols for electronic surveillance and control.**

Supports more than 150 languages in both Indian and foreign.

Additional Features

-
-
-
-
-
-

The module enables library staff to handle all the major functions, such as

- **Suggestions management;**
- **Order processing, cancellation and reminders;**
- **Receipt, Payment and budgetary control;**
- **Master files such as currency, vendors, publishers**
- **Reports.**

Acquisition

Catalogue module is used for retrospective conversion of library resources. The strong features of catalogue module are:

- **allows user-generated customized reports;**
- **facilitates authority database of person name, corporate body, subject headings and series name;**
- **master database of publishers;**
- **supports full MARC 21 bibliographic format.**

Catalogue

This module takes care of all possible functions of circulation. The circulation module is fully compliant with the NISO Circulation and Interchange Protocol (NCIP) version 2.0 for electronic surveillance and RFID based transaction of the items. Major functions of the circulation module:

- **Membership;**
- **Transaction;**
- **Inter-library loan;**
- **Over due charges;**
- **Reminder;**
- **Search status;**
- **Maintenance of the items such as binding, lost, replace, missing, withdrawl, etc.;** and
- **Report generation based on the various requirements.**

Circulation

The serial control module is developed based on the KARDEX system and has following functions built into it: suggestions;

- **subscriptions;**
- **check-in of individual issues of journals;**
- **payment, reminder, binding, and title history;**
- **export / import by using ISO 2709 bibliographic exchange format;**
- **article indexing of journal/book articles;**
- **cataloguing of electronic journals; and**
- **keeps track of the history changes of the journals.**

Serial Control

One can search article from any issue of the journals available in the library

Administration module include following features:

- **grouping of users based on the policy;**
- **transactional rights over the systems;**
- **transaction level security to users;**
- **various configuration settings such as labels, e-mail and other parameters related to the software use; and**
- **common master databases being used in modules.**
