

CAS 146-21: Call for TBScience Late-Breaker Abstracts

[View this email in your browser](#)

In some exciting news, for the first time ever, we have put out a call for [Late-Breaker abstracts for TBScience 2021](#).

This year, TBScience has been integrated into the [Union World Conference on Lung Health](#) programme schedule, which will be held virtually from 19-22 October 2021. We are welcoming Late-Breaker abstract submissions from **17 August-15 September**.

We want to recognise new research that did not get a chance to be presented during the initial call for TBScience submissions. Therefore, unlike the initial call for abstracts, **Late-Breaker abstracts do not need to align with one of the four conference themes** selected for this year's edition of TBScience but must focus on the following research fields:

- a. Basic research (microbiology, immunology, -omics, etc)
- b. Animal model studies
- c. Clinical research
- d. Epidemiology and transmission modeling

Please note that for submissions, **new research with results from the last 6 months** prior to the submission deadline (from 16 March 2021) are requested. Abstracts must contain original data **not published** at the time of the abstract submission deadline. For more details and practical information, click [here](#).

If you have any further queries, please email tbscience@theunion.org

We look forward to receiving your submissions.
